MRR

Insights:

Revenue dropped in March but shows recovery in April, suggesting short-term volatility.

Churned Subscribers by Plan Type

Churned Subscribers by Country

Churned Subscribers by Device

Signup Date

Plan type

- ☐ Basic
- ☐ Premium
- ☐ Standard

Insights:

- Churn is highest on the Basic plan, indicating weaker value retention.
- Mobile users show higher churn than web users, indicating potential mobile UX or performance issues.
- Certain regions show higher churn and may need targeted investigation.

Retained Users by Signup Cohort

Each cohort represents users grouped by their signup month.

Retention Rate by Signup Month

Insights:

- Earlier cohorts retain better than recent ones, suggesting declining acquisition quality or onboarding gaps.
- Retention stabilises after the first month, indicating users who stay early tend to remain loyal.

Feature Usage by Event Type

Feature Usage: Active vs Churned Users

Plan Type

- ☐ Basic
- ☐ Premium
- ☐ Standard

Device Type

- ☐ Android
- ☐ iOS
- ☐ Web

Insights:

- Retained users engage more with "save_item" and browsing features.
- Churned users show higher "cancel" activity and lower overall engagement.
- Encouraging early adoption of key features like "save_item" may improve long-term retention.
